smirdex
Coated Abrasives Industry

HUMAN RESOURCES play the most important role in all our activities. Goals are set clearly and people working at smirdex are heading towards their accomplishment through well-described strategies. Qualified personnel are developing throughout their career in smirdex and many opportunities are offered in order for them to enrich their professional skills. The philosophy here is to be open to new ideas and suggestions that could lead to innovative procedures and solutions. We encourage the dialogue between teams and persons and information is spread at all organisational levels. Management is always willing to listen to employees' requests and problematic, as these affect their working efficiency. Last but not least, we always take care of our staff by providing safe and healthy working conditions.

ENVIRONMENT is respected in all organizational procedures. From the product planning stage to the shipment of orders, environmental issues are strictly taken into consideration. Our major goal is to manufacture long-life products thus contributing to the reduction in the amount of global waste. Moreover, we seek for better recyclable packaging and safe waste disposal methods. Respecting the end user of our products we strive for offering highly safe products that will not harm their health (dust-free solutions).

DEVELOPMENT has always been our major concern. Sophisticated ideas and unique solutions are implemented in order to deliver value enhanced products and services to our customers. The continuous feedback from their part contributes significantly to the development of new and the improvement of existing products.

New techniques and methods are tested in the company's high-tech laboratories by our specialised staff and sometimes, academic research is taken over by the university and other educational entities. Usually, specific machinery is needed in order to develop and test those new techniques and methods. Therefore, we constantly invest in designing and constructing machines and equipment on our own.

Smirdex is one of the leading manufacturing companies of coated abrasives in South-Eastern Europe. Located in Northern Greece, at an area of 32.000m², of which 16.000m² are built, smirdex produces coated abrasives of high quality since 1981. Thanks to the continuous efforts for improvement of its specialized staff, the company has managed to grow bigger and meet the demanding standards of the industry. Recently a second sophisticated and high-tech production line has been set up, thus increasing company's capacity to 40.000 m² per shift.

Today, the company exports to more than **50** countries worldwide. 85% of its production is sent abroad whilst 15% is distributed in the Greek market. Our major goal is to encounter the evolving needs of modern professionals and therefore we constantly invest in research and development. Open to new and evolving ideas the company has managed to deliver high-tech products. High standards of quality control throughout the manufacturing process are ascertained by sophisticated, on-site electronic systems whilst the continuous product evaluation ensures the highest quality according to the industry's standards.
